(Dated: December 5, 2013)

## Abstract

Here's an abstract.

## **I. INTRODUCTION**

Here's what we're trying to do.

## **II. NFL STATISTICAL CATEGORIES**

About the stats.

## **III. ESTIMATES OF THE UNCERTAINTIES**

About the bootstrap method.

## **IV. RESULTS**

The correlation coefficients.

## **V. INTERPRETATION OF RESULTS**

Can we draw any conclusions?

## **VI. CONCLUSIONS**

Summary of the analysis.

## **ACKNOWLEDGMENTS**

We gratefully acknowledge Harvey Gould and Jan Tobochnik, who created an earlier AJP L<sup>A</sup>T<sub>E</sub>X sample article that inspired this one. This work was supported by the American Association of Physics Teachers.

- <sup>4</sup> REV<sub>T</sub>E<sub>X</sub> 4 Home Page, <<https://authors.aps.org/revtex4/>>.
- <sup>5</sup> On the other hand, you can avoid the installation process entirely by using a cloud-based L<sup>A</sup>T<sub>E</sub>X processor such as ShareLaTeX, <<https://www.sharelatex.com/>>, or writeL<sup>A</sup>T<sub>E</sub>X, <<https://www.writelatex.com/>>.
- <sup>6</sup> In typography, aesthetics often takes precedence over logic.
- <sup>7</sup> Please don't try to handle foreign characters and accents with the `inputenc` and `fontenc` packages, which are incompatible with AJP's editing process.
- <sup>8</sup> See the Mathematics chapter of Ref. 2 for an excellent overview of math symbols and equations, with examples.
- <sup>9</sup> Thinking up a good label name takes a moment, but it's worth the trouble; we strongly advise against using labels like `eq2`, which become extremely confusing after you decide to add another equation before Eq. (??).
- <sup>10</sup> You need to process a file twice to get the counters correct.

- <sup>14</sup> Many L<sup>A</sup>T<sub>E</sub>X users manage their bibliographic data with a tool called BIB<sub>T</sub>E<sub>X</sub>. Unfortunately, AJP cannot accept BIB<sub>T</sub>E<sub>X</sub> files; all bibliographic references must be incorporated into the manuscript file as shown here, at least when you send an editable file for production.
